# PeopleUX

# PeopleUX for PeopleSoft Supply Chain Management

Drive Maximum Engagement, Productivity, and ROI

A *recent study indicated that 70% of an organization's employees (users and managers) participate in the requisition/purchasing and approval process. With each transaction taking 15 minutes (avg.), the opportunity cost over time adds up.

PeopleUX accelerates the requisition/purchasing and approval process, maximizing employee productivity:

- **93%** Faster Requisition/Purchasing Entry
- **98%** Faster Manager Approvals
- **84%** Faster Supplier Onboarding

## 92% Reduction in Procurement Labor Costs

### Use Cases:
- Approvals
- Purchasing/Requisition Entry
- Supplier Management
- Item Management

### Benefits
- Shorten approval process
- Increase productivity
- Protect investment in existing SCM systems
- Improve employee satisfaction

## Deliver PeopleSoft SCM to your employees wherever they are - on all form factors

### Consolidated Requisition Home Page
- Descriptive icons with navigation links displayed in a lightbox when selected
- Intuitive navigation to quickly and easily find the transactions end users need
- Mobile and Tablet friendly design to allow for a more flexible and scalable supply chain
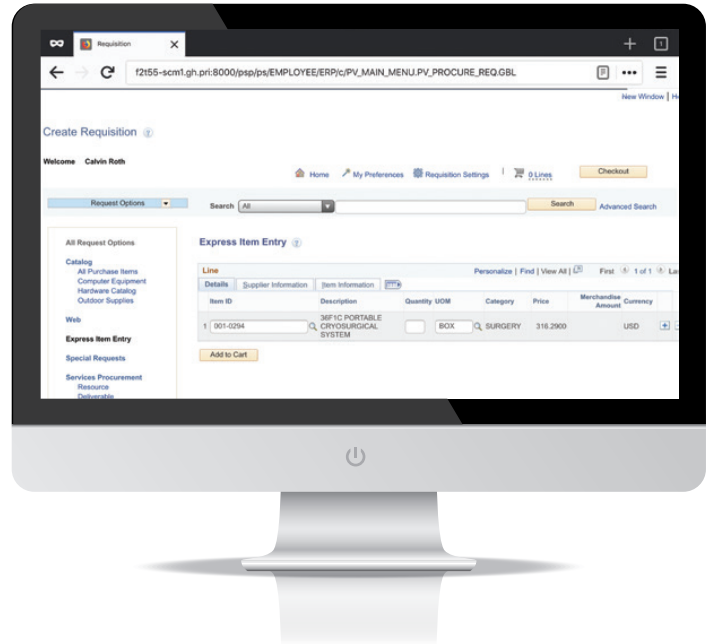

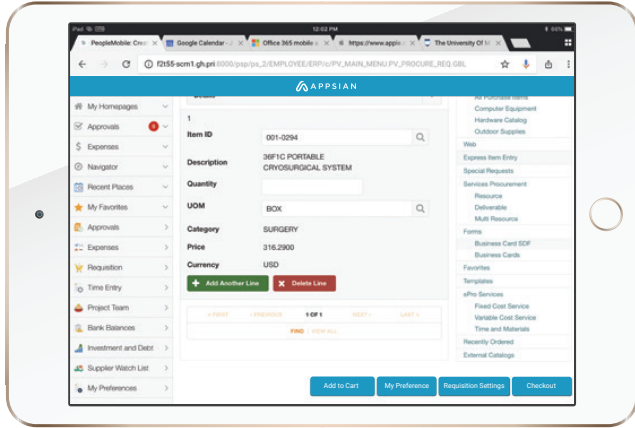

**PeopleSoft**

**PeopleSoft + PeopleUX**

## Streamlined Requisition Entry

- Screen reorganization for rapid data entry

**PeopleSoft**

**PeopleSoft + PeopleUX**

**PeopleSoft + PeopleUX**

## Engaging Approval Workflow

- Grouped approvals by function
- Color-coded notifications (by approval status) for improved task prioritization

*2018 ROI analysis from POC for (3) 10,000+ employee organizations
